

VIDEOS

Principles of managing your data, keeping notes, keeping a tidy set up

CLASS 1

Modifying dataframes

Adding/removing columns

Combining columns

Filtering data - by rows, columns

Changing form of data - melt, pivot

Transforming data - operations over series

Good data set to use for this?

CLASS 2

Practise reading in data, finding problems, renaming columns and subsetting/re-arranging Changing from one dataform to another

Students pick a data set from a set of 10 and produce a new data frame and summary stats from it
